**Address:** Maltepe, Istanbul

### ABOUT ME

I am a 4th-year Software Engineering student specializing in Artificial Intelligence, Data Science, and Mobile Development. Through academic projects, internships, and leadership roles, I have gained hands-on experience in Big Data and ML/DL. As Vice President of the Maltepe University Teknofest Club and a Data Science intern at Innova, I combined technical expertise with project coordination and team management. By the end of this semester, I will have completed all my coursework, with only the second part of my capstone project remaining for the next term. This gives me a free semester, which I aim to dedicate to long-term internship opportunities.

### EXPERIENCE

**Innova Bilişim, Türk Telekom - Data Science & Data Management Intern | June, 2025 – July, 2025**  
Worked on projects focused on data science and big data as part of the internship, gaining hands-on experience with data processing, analysis, and related tools.

**Vice President, Maltepe University Teknofest Club | August, 2025 - Present**  
Coordinated club activities, managed projects, and supported leadership in organizing events and competitions.

### EDUCATION

| Maltepe University (2021 - Present) | Amasya Kutlubey Science High School (2017 - 2021)     |
|-------------------------------------|-------------------------------------------------------|
| Software Engineering (EN) - 3.04    | YÖK Data Analysis School - AI Module (2025 - Present) |

### SKILLS

|                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                      |
